The Departments of Biology and Environmental Science and Chemistry offer an interdisciplinary major program of study to a Bachelor of Arts in Biochemistry. The major program is structured into two emphasizes, Biological Emphasis and Chemical Emphasis, to allow the student to pursue a more advanced study of biochemistry to fulfill their particular interests and professional goals. Both emphasizes require introductory Biology and Chemistry courses with emphasis on fundamental concepts and give students a clear insight into the underlying biological and chemical principles. The Biodiversity, Biological Processes and General Chemistry courses fulfill the general degree requirements for a course in laboratory science as well as serving as foundation courses for Biochemistry students.

Students completing a Biology or Chemistry major may not also receive a Biochemistry major. Students majoring in Biochemistry cannot obtain a second major or minor in Biology or Chemistry.

Any student who elects to take BIO 404 (*Biochemistry*) must have successfully completed both semesters of Organic Chemistry or be currently taking CHM 324/325. No more than four hours of BIO 398 *Independent Study Research Projects*, may be counted toward the major. Students must earn a letter grade of C- or better in all courses, as well as a 2.0 GPA in major courses to satisfy major requirements for graduation.

The Chemical Emphasis track of the major focuses more strongly on the chemical, physical and mathematical applications of biochemistry. Students are required to complete fundamental core courses in biology, chemistry, mathematics, and physics. In addition to the core courses students are also required to complete two biology electives and one chemistry elective.
